

SendQuick® Alerter

SMS Alerts to Reduce System Downtime

- Firewall under attack
- Intrusion, virus or malicious attack to IT Infrastructure
- Power supply interruption
- Designed for entry level and cost-effective usage!

Short Messaging Service (SMS) has gained tremendous popularity in many countries. There are many corporations who are using SMS for simple messaging, communication, CRM, e-commerce and transactional based applications.

Enjoy the benefits of quick and concise alerts! SendQuick Alerter is a low cost entry level appliance that caters to companies requiring simple alert usage. SendQuick Alerter works with your firewall, IDS/IDP, antivirus, server monitoring software and others. It has the required features to convert your email alert messages from your monitoring and security infrastructure to SMS, providing instant and concise information on the events happening in your office and data centres.

We believe that you should not be spending your valuable resources in setting up a SMS server and have designed SendQuick® Alerter as an out-of-the-box appliance server. This means the fastest and most economical way for you to get your SMS server up and running in just minutes!

KEY FEATURES

- Easy to set up (get it working in less than 5 minutes!)
- Support unlimited numbers of firewall, IDS, anti-virus, UPS, network monitoring system, database and other servers
- Supports email alert messages for events and converting them to SMS
- Support Network Monitor (PING) and send SMS when device is unavailable
- Fast throughput (up to 20 messages per minute, per modem)
- Hassle free integration (to unlimited number of back-end applications and processes)
- Dual integration method: via email or HTTP Post for sending and receiving SMS
- All messages are date / time stamped for monitoring and tracking purposes
- Highly scalable supporting up to 32 modems and direct connection to mobile operators
- Built-in SMTP email gateway and email relay function to relay email alert messages and serves as a back-up email gateway for the enterprise
- No maintenance and administration
- 2-way SMS communication
- Plug-and-play into your network (LAN)
- Auto load handling and auto message distribution for efficient message receiving and sending
- Telco-independent (the GSM or 3G modem can send to all mobile operators with SMS interoperability)
- 24 x 7 x 365 operations

COMPLEMENT YOUR SYSTEMS

SendQuick® Alerter server is ideal for your IT / security infrastructure or datacentre. It will complement your infrastructure system like:

- Router
- Intelligent switch
- Firewall
- Intrusion detection / prevention system
- Anti-virus server
