- Dual integration method: via email or HTTP Post (REST API) for sending and receiving SMS
- All messages are date / time stamp for monitoring and tracking purposes
- Highly scalable supporting up to 32 modems and direct connection to mobile operators
- Built-in SMTP email gateway and email relay function to serve as a back-up email gateway for the enterprise
- No maintenance and administration
- 2-way SMS communication
- Plug-and-play into your network (LAN)
- Auto load handling and auto message distribution for efficient message receiving and sending
- Telco-independent (the GSM modem can Send to all mobile operators with SMS interoperability)
- Messaging delivery options including SMS SIM, telco connections and messengers.
- 24 x 7 x 365 operations

Unlock the Power of Instant Alerts

Thinking of enhancing your business messaging and communication strategies, especially in terms of customer relationship management and alert notifications? Does ease of use, cost-effectiveness, and real-time alert delivery matter in setting up a SMS server?

Short Messaging Service (SMS) and omnichannel social messaging have become immensely popular worldwide, serving as a versatile tool for corporations from simple messaging to customer relationship management, e-commerce, and transactional-based applications. SMS and social messaging tools are an incredibly useful and non-intrusive messaging method, making it ideal for alert messages.

SendQuick Alert seamlessly integrates with your firewall, IDS/IDP, antivirus, server monitoring software, and more. Recognizing the need for quick and concise alerts, SendQuick Alert SMS system is designed to transform your email alert messages from your monitoring and security infrastructure into SMS, or other omnichannel messaging format. Stay informed about the events happening in your office and data centers in an instant and concise manner.

Why delay when you can start reaping the benefits of SendQuick Alert today? Eliminate the complexities of setting up an SMS server and save on maintenance costs. Our user-friendly, out-of-the-box appliance server guarantees a seamless experience, allowing you to focus on what matters most—your business.

COMPLEMENT YOUR SYSTEMS

SendQuick® Alert server is ideal for your IT / security infrastructure or datacentre. It will complement your infrastructure system like:

- Router
- Intelligent switch
- Firewall
- Intrusion detection / prevention system
- Anti-virus server
- Network monitoring systems
- Infrastructure monitoring systems
- Security monitoring systems
- Back-up power management system (UPS)
- Cabling management systems
- Environment management systems

BENEFITS

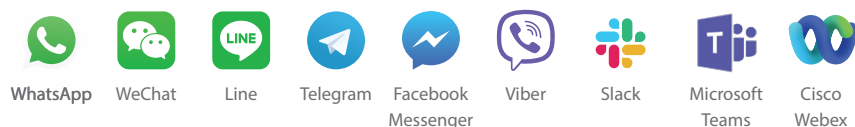

- Instant alert on SMS, reducing downtime
- SMS is delivered anytime, anywhere (even when you are overseas!)
- Get SMS reply from your support team for acknowledgement
- Selective SMS alert (with filter) and only the important events
- SMS store & forward, with guaranteed delivery (network dependant)
- Send multiple SMS for each alert to different people
- Support unlimited applications, devices and servers (good ROI)

USERS

- Banks / Insurance / Financial Institutions
- Stock Exchange
- Stock (Securities) Broking Firms
- Government
- Asset / Fund Management
- Telecoms / Operators
- Travel related companies
- Hotels and service-based companies
- MNCs / Factories
- All companies concern with security and system uptime

INTEGRATION WITH SOCIAL MESSENGERS
