PUBLIC CLOUD PLATFORMS

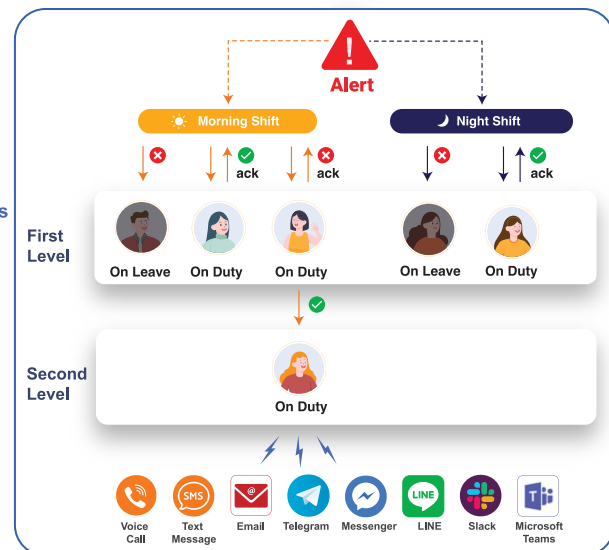

CLOUD APPLICATIONS

2-way Alerts and Responses

ROSTER MANAGEMENT

Mobile Alerts from the Cloud

Are you ready to unlock the full potential of your cloud infrastructure? Look no further than SendQuick Cloud, the systems availability monitoring and notification management platform designed to keep your business thriving in the cloud.

It is time to take control of your digital landscape with ease and confidence. Stay one step ahead of potential issues with our instant notification system.

SendQuick Cloud easily integrates with public cloud services to monitor IP-addressable systems, applications and infrastructure network. It is important that you are equipped with all the information necessary to mitigate potential damage to your business – quickly and

accurately. Whether it is critical system updates, important notifications, or real-time information, our seamless cloud integration keeps you connected and in control.

With SendQuick Cloud, critical alerts never go unnoticed as real-time notifications are sent to the mobile phones of your key IT staff on duty. Be it through SMS or your favourite social messaging platforms like Facebook Messenger, Telegram, and LINE, as well as collaboration tool such as Microsoft Teams and Slack.

Get a clear view of your IT network and systems with timely alerts delivered right to your fingertips – with SendQuick Cloud!

KEY BENEFITS

Immediate Notifications

Sends immediate notifications on critical issues, providing you with visibility over your entire IT infrastructure health status.

Roster Management

Only relevant personnel on duty will be alerted.

Public Cloud Integration

Seamless integration with public cloud services, including Azure Cloud, AWS Cloud, Google Cloud, Oracle Cloud, Alibaba Cloud, and Huawei Cloud.

Avoid Alert Fatigue

Avoid missing out on important alerts due to a massive influx of notifications. By configuring the Monitoring Frequency, the Trigger Mode and the Alert Mode, you now have the flexibility to receive alerts on what best suits your business needs.

User Management

Configure messaging services to ensure that you receive alerts through your preferred mode of communication.

KEY FEATURES

Ensure Application Availability

Actively monitor application availability using Ping, Port, and URL checks, and notify of any incidents that occur.

Social Messenger App Integration

Receive your alerts on major messaging platforms such as Facebook Messenger, Telegram, and LINE, as well as collaboration tools like Microsoft Teams and Slack.

Emails to Text Messages

Supports Email (SMTP)-to-Text for all applications that can send email. The emails are easily converted to text messages with a policy filter to ensure that only the relevant messages are sent.

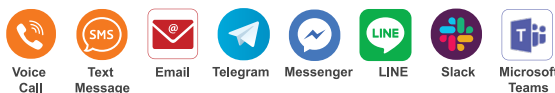

Integrates with Any Application

Able to integrate with any application (security, network and applications) as well as all infrastructure management tools (including DCIM, SIEM, NMS, ITSM) as we support Email-to-Text.

INTEGRATION WITH SOCIAL MESSENGERS

SendQuick Cloud integrates with existing applications to send messages instantly via SMS, email and social messengers:
