

DATA SHEET

Absolute Control

Retain command of all your endpoints, all the time – even if they're off your corporate network.

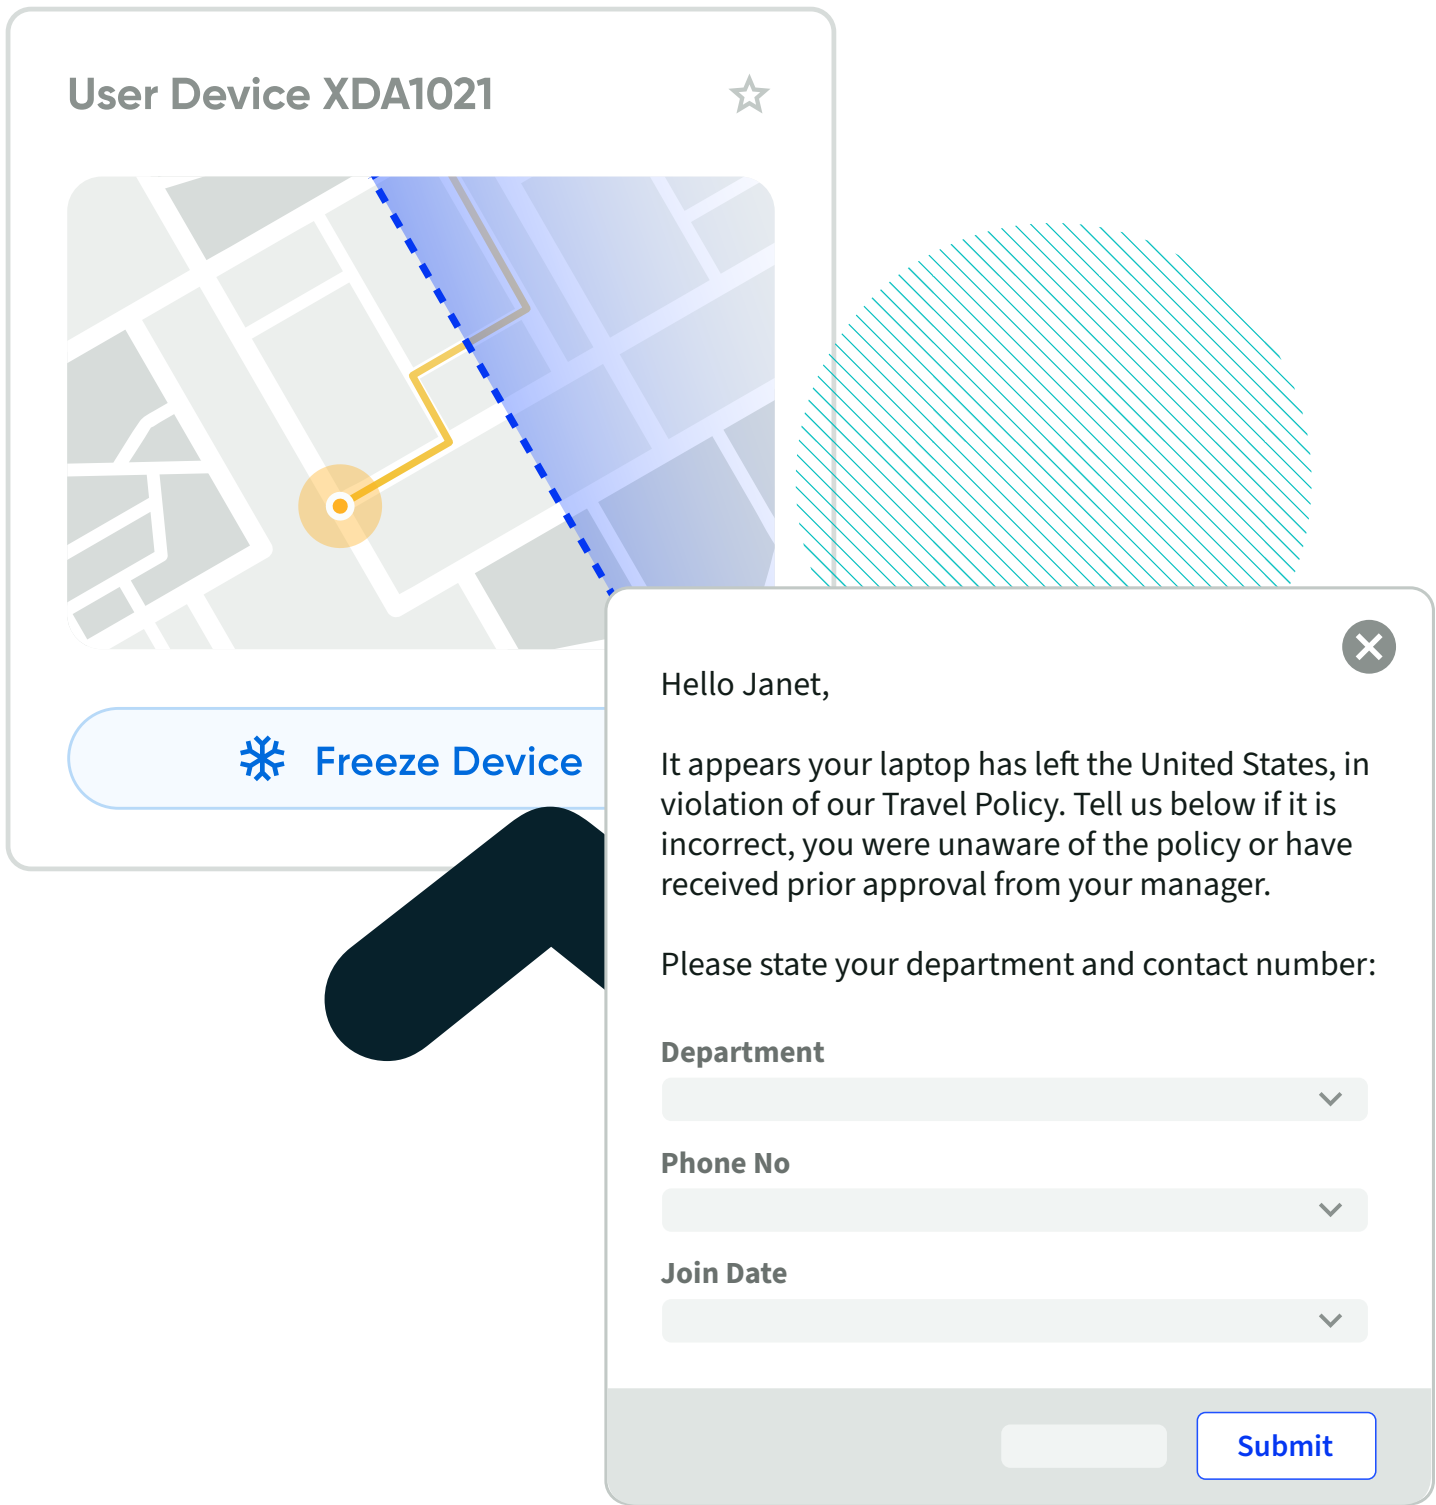

absolute.com

Endpoint visibility is important. However, it's even more crucial to safeguard your devices, applications, and data based on what you've learned by gathering the truth across your endpoints. Endpoint control is therefore the next logical step in your endpoint management and security strategy. This holds especially true because most attacks begin on endpoints used by people – not the firewall or your servers. Typically, attackers gain control over these entry points to the network through techniques like phishing; from there, they can move laterally to access your servers.

Therefore, it's crucial to always retain command over all endpoints so you can remediate risks before they become incidents.

ABSOLUTE®

Harvest the Power of the Absolute Resilience Platform

That's where Absolute Control™ helps, as it combines all the capabilities of **Absolute Visibility™** (e.g., reporting on hardware/software inventory, device and Web app usage, device security posture, critical application health, endpoint data detection, and geolocation) with critical control functions such as remote file deletion and data wipe, freezing devices on demand when at-risk, end user messaging, as well as establishing geofences and alerts.

You can control your entire device fleet from the cloud-based Absolute® Console, which is part of the **Absolute Resilience Platform**. Leveraging the always-on connection provided by Absolute Persistence® technology, which is embedded in more than 600 million devices from leading system manufacturers, you can retain command of all your endpoints. Whenever a user attempts to alter or remove it, Absolute reinstalls itself, ensuring a secure, always-on connection between the Absolute Platform and the endpoint.

Your Lifeline to Protect At-Risk Devices

Absolute Control provides the lifeline to protect at-risk devices and data — even if they're off your corporate network.

- ✓ **Establish Geofences** Set geo-zones and timers to automatically trigger actions whenever a device leaves a 'safe' area or stops calling in, as well as detect unauthorized device movement
- ✓ **Selectively Delete Files from Devices** Remotely delete specific files from at-risk devices, perform end-of-life actions, and streamline remote device decommissioning
- ✓ **Wipe Data from Devices** Remotely wipe data from at-risk endpoints and perform end-of-life media sanitization by remotely wiping a device's hard drive and generating compliance certificates
- ✓ **Remotely Freeze At-Risk Devices** Freeze at-risk devices on demand or on a schedule and prevent spread of a ransomware infection or preserve evidence for litigation purposes
- ✓ **Send Secure End User Messaging** Inform users in a timely and coordinated fashion by displaying important messaging on their devices' screen and solicit feedback
- ✓ **Remote Firmware Protection*** Activate firmware supervisor control remotely and at scale, as well as minimize risk of firmware attacks

Looking for a Bigger Toolbox?

While Absolute Control provides you a lifeline to protect at-risk devices and data, the Absolute Secure Endpoint product portfolio offers you additional service tier options that might fulfill further business needs. Check out Absolute Resilience, Resilience for Security, and Resilience for Automation to determine what service tier is right for you.

Absolute Visibility

Source of truth for device and application health.

What's Included

- ✓ Device Health
- ✓ Security Posture
- ✓ Device Usage
- ✓ Geolocation
- ✓ Web Application Usage
- ✓ Endpoint Data Discovery
- ✓ Customizable Dashboards
- ✓ AI Assistant

Absolute Control

Lifeline to protect at-risk devices and data.

All Visibility capabilities, plus

- ✓ Geofencing
- ✓ Device Freeze
- ✓ File Delete
- ✓ Device Wipe
- ✓ End User Messaging
- ✓ Remote Firmware Protection

[See Related Resources](#)

Absolute Resilience

Delivers application self-healing and endpoint recovery from unexpected downtime.

All Control capabilities, plus

- ✓ Application Health
- ✓ Application Resilience
- ✓ Remediation Script Library
- ✓ Investigations and Recovery of Lost/Stolen Devices
- ✓ Rehydrate
- ✓ Required Applications

Absolute Resilience for Security

Seamless and proactive patch management.

All Resilience capabilities, plus

- ✓ Patch Management
- ✓ Third-Party Application Patching
- ✓ Patch Compliance Reporting

MOST POWERFUL

Absolute Resilience for Automation

Remediation of security vulnerabilities through automated workflows.

All Resilience for Security capabilities, plus

- ✓ Vulnerability Remediation
- ✓ Continuous Monitoring
- ✓ Intelligent Automation and Workflows

ABSOLUTE®

Absolute Security is partnered with more than 28 of the world's leading endpoint device manufacturers, embedded in the firmware of 600 million devices, trusted by thousands of global enterprise customers, and licensed across 16 million PC users. With the Absolute Security Cyber Resilience Platform integrated into their digital enterprise, customers ensure their mobile and hybrid workforces connect securely and seamlessly from anywhere in the world and that business operations recover quickly following cyber disruptions and attacks. Our award-winning capabilities have earned recognition and leadership status across multiple technology categories, including Zero Trust Network Access (ZTNA), Endpoint Security, Security Services Edge (SSE), Firmware-Embedded Persistence, Automated Security Control Assessment (ASCA), and Zero Trust Platforms.
