Resecurity

Who Are We?

Resecurity is a cybersecurity company that delivers a unified platform for endpoint protection, risk management, and threat intelligence for large enterprises and government agencies worldwide. Unlike other threat intel companies that only provide data lakes and visualization, without any meaningful correlation or analysis, Resecurity delivers human curated, in-depth analysis, layered on top of the most comprehensive, exclusive sets of data from the Deep and Dark Web.

Why What We Do Matters

Today, it is not enough to know what's happening IN your network. Organizations must have situational intelligence as to what is happening outside their environment - who is targeting them, how are they behaving, and who is working together to put your company at risk? We deliver Human curated, in-depth analysis.

Our mission is to combat cyber threats for organizations of all sizes, making the world a safer place for everyone.

The Hunter Unit

The Hunter Unit ™ is an elite group of subject matter experts experience in technology development, malware research, network exploitation, defense and system strategies due their background in law enforcement, government, military agencies and enterprises. The Hunter Unit is the offensive line against threats, curating all data intelligence, behind Resecurity's Context™ platform, validating information and delivering it in the most actionalbe format to customers.

About Our Products

Resecurity's Context™, a cyber threat intelligence platform for enterprises and government agencies, delivers cyber threat intelligence harvested from millions of data points combined with data science, allowing for actionable insights.

Risk™ product calculates a daily security score based upon a summary of all risks for a company's monitored domains, IP, network, vulnerabilities and cloud services. Geo-location capability delivers contextual information identifying low, medium and high-risk areas for managing infrastructure, network resources and other company assets.

Our Customers

At Resecurity we are passionate about protecting our clients. Working with Resecurity, companies can easily and efficiently collaborate across their vulnerability and risk, threat intelligence, penetration testing and broader security teams to quickly reduce fraud, minimize the attack surface of an organization, and shut down ongoing attacks, saving companies millions of dollars.

CONTEXT™ Platform

5B

Threat Artifacts
including indicators of compromise (IOCs), tools, tactics and procedures (TTPs) of adversaries with valuable meta-data stored in historical form used for investigations.

9M

Adversaries
collected from various underground communities and criminal marketplaces, intelligence reports and security expert community with associated metadata.

870M

Dark Web Entries
indexed and tagged data entries with extracted artifacts, associated metadata, graphical screenshots and links visualization.

40

Languages
a built-in offline translation solution and unique linguistic expertise in order to provide details on threat actors' chatter.

30K+

Sources
a constantly updated repository of Dark Web sources, including: Tor; I2P, Freenet, IRC, IM groups (Telegram).
